Revision History

Version	Date	Name	Description
1.0	22/04/2020	Pietro Moretto	Initial document

The project will be considered a success if

- The web application MarconiTT is fully functional inside the containerized environment on the server edu-x08
- The timetable change process works correctly without errors or data loss
- The new added features (multiple days booking and calendar) are 100% functional
- There are no bugs or data leaks
- There is a complete project documentation
- A fully functional test system has been delivered
- It's possible to successfully log in using AD credentials
- The ETL API works correctly
- The production server (edu-x08) is stable and it provides access to the web application MarconiTT by clicking a tile on a landing page
